

# Fountain K

The Fountain K is a machined fountain pen that comes in aluminum, brass, and copper. The pen comes with a German #5 nib and converter and will also work with both short and long international ink cartridges (not included). To clean your Fountain K, wipe it down with a soft cloth, using mild detergent or alcohol. Never use abrasives or harsh chemicals to clean your pen, as it may damage the surface. The aluminum version of the Fountain K needs no special treatment to maintain the anodized finish. The copper and brass versions can be polished or left to age naturally. The Fountain K is not a toy and should not be used by children as small parts may cause choking. We are not responsible for any damage caused by the misuse of the Fountain K. And remember, even though the pen is mightier than the sword, this should not be taken literally as the Fountain K is very short and not very sharp, and actually attempting to engage in combat will probably result in loss of limb or life and make writing letters much more difficult.

And, as always, the Fountain K is designed and manufactured by us, here in the USA.

**Compatible Refills:**  
Standard and Long International Cartridges  
K5 Converter

**Aluminum Weight:** 28.4g / 1.00 oz  
**Brass Weight:** 76.9g / 2.71 oz  
**Copper Weight:** 78.2g / 2.76 oz
